

Eda leaves the university at 10:30 pm.

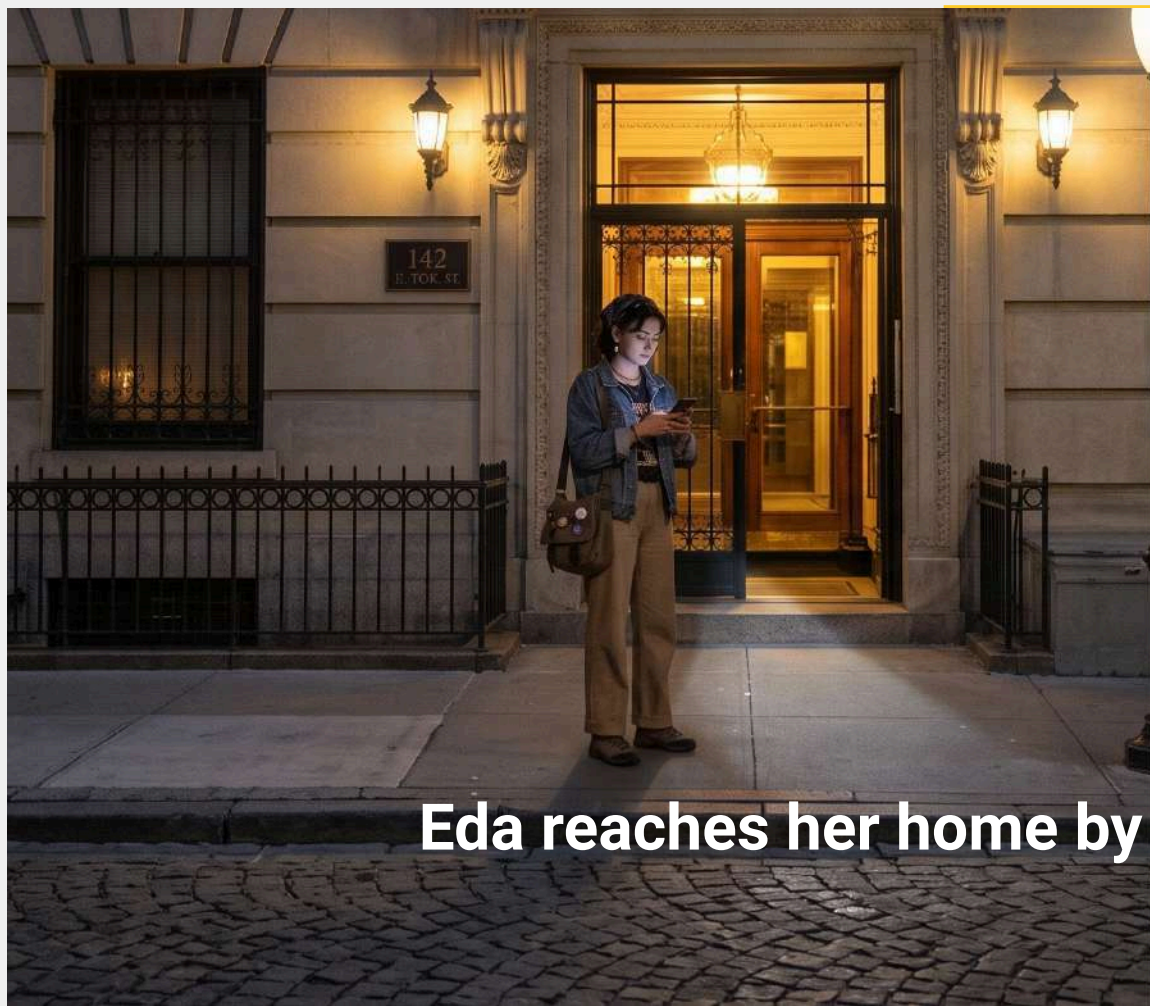

Google Maps suggests the shortest route, which takes 18 minutes.

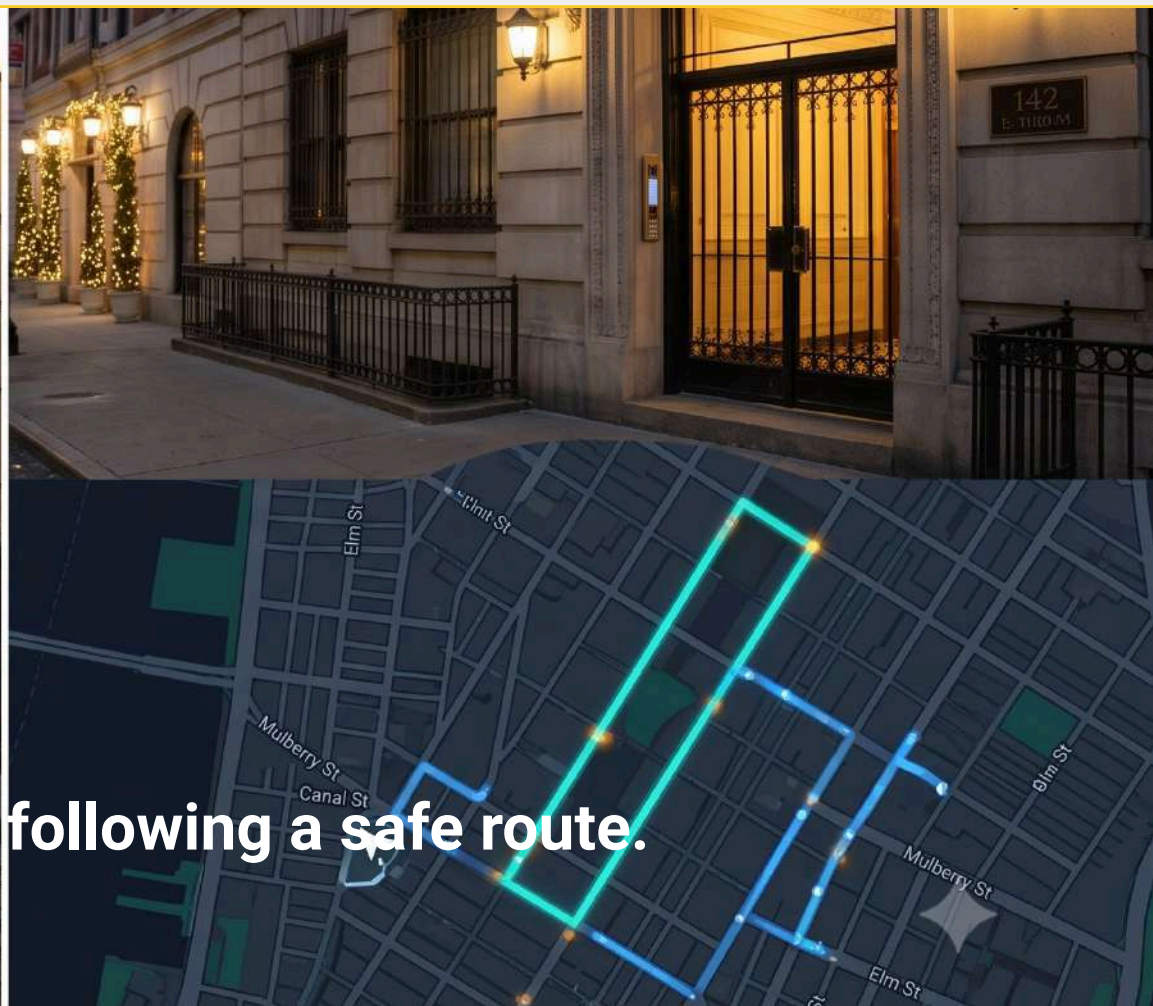

However, this route goes through dark streets.

Saferoute suggests a safer route.

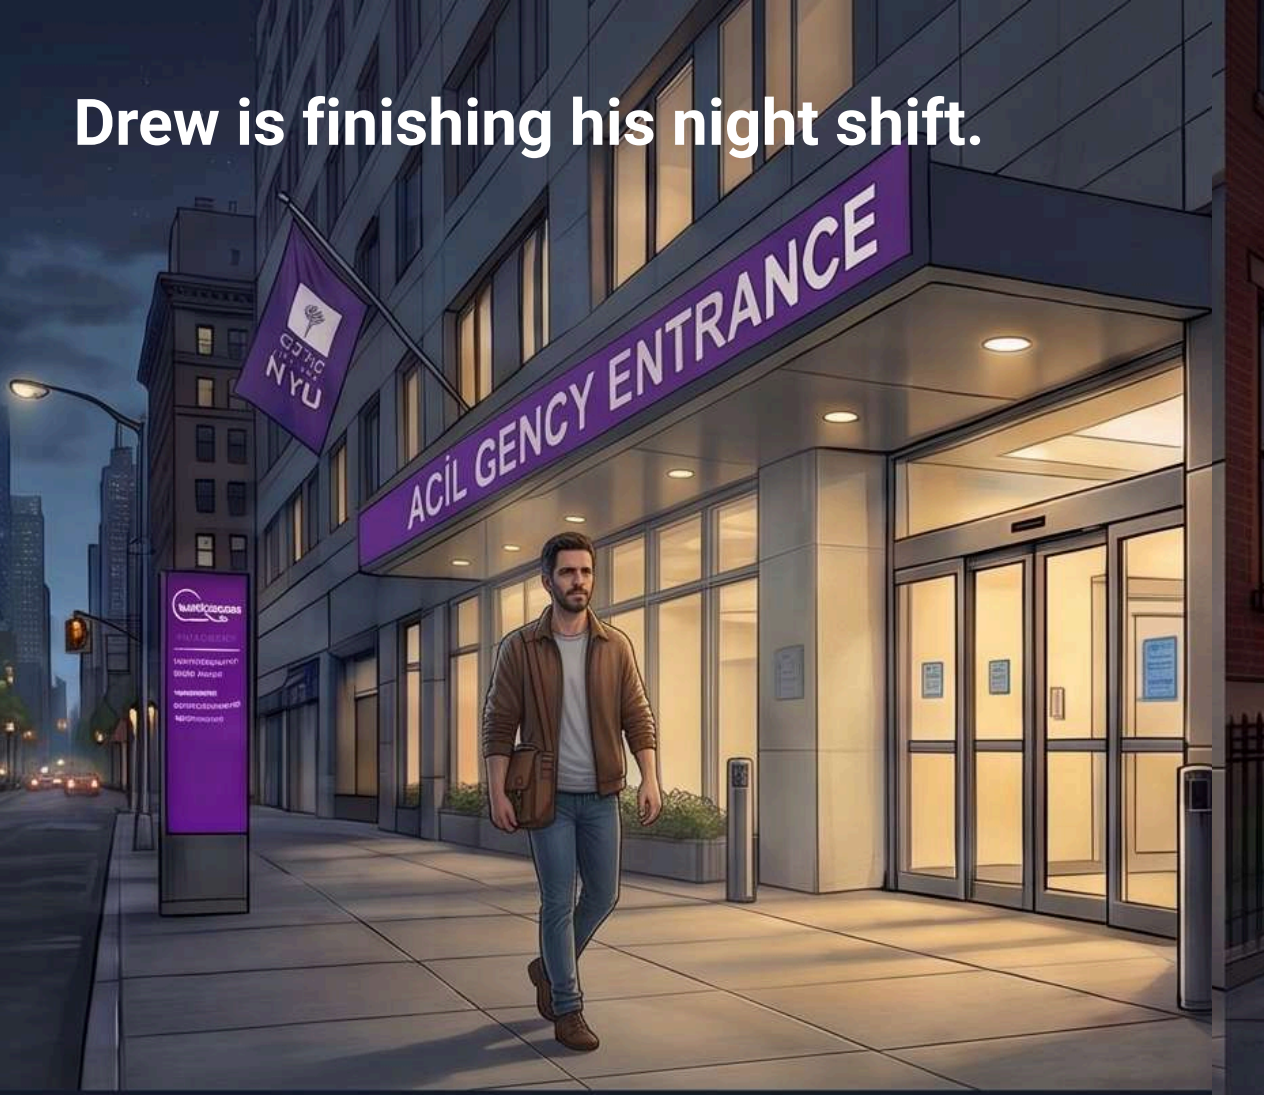

Eda reaches her home by following a safe route.

Drew is finishing his night shift.

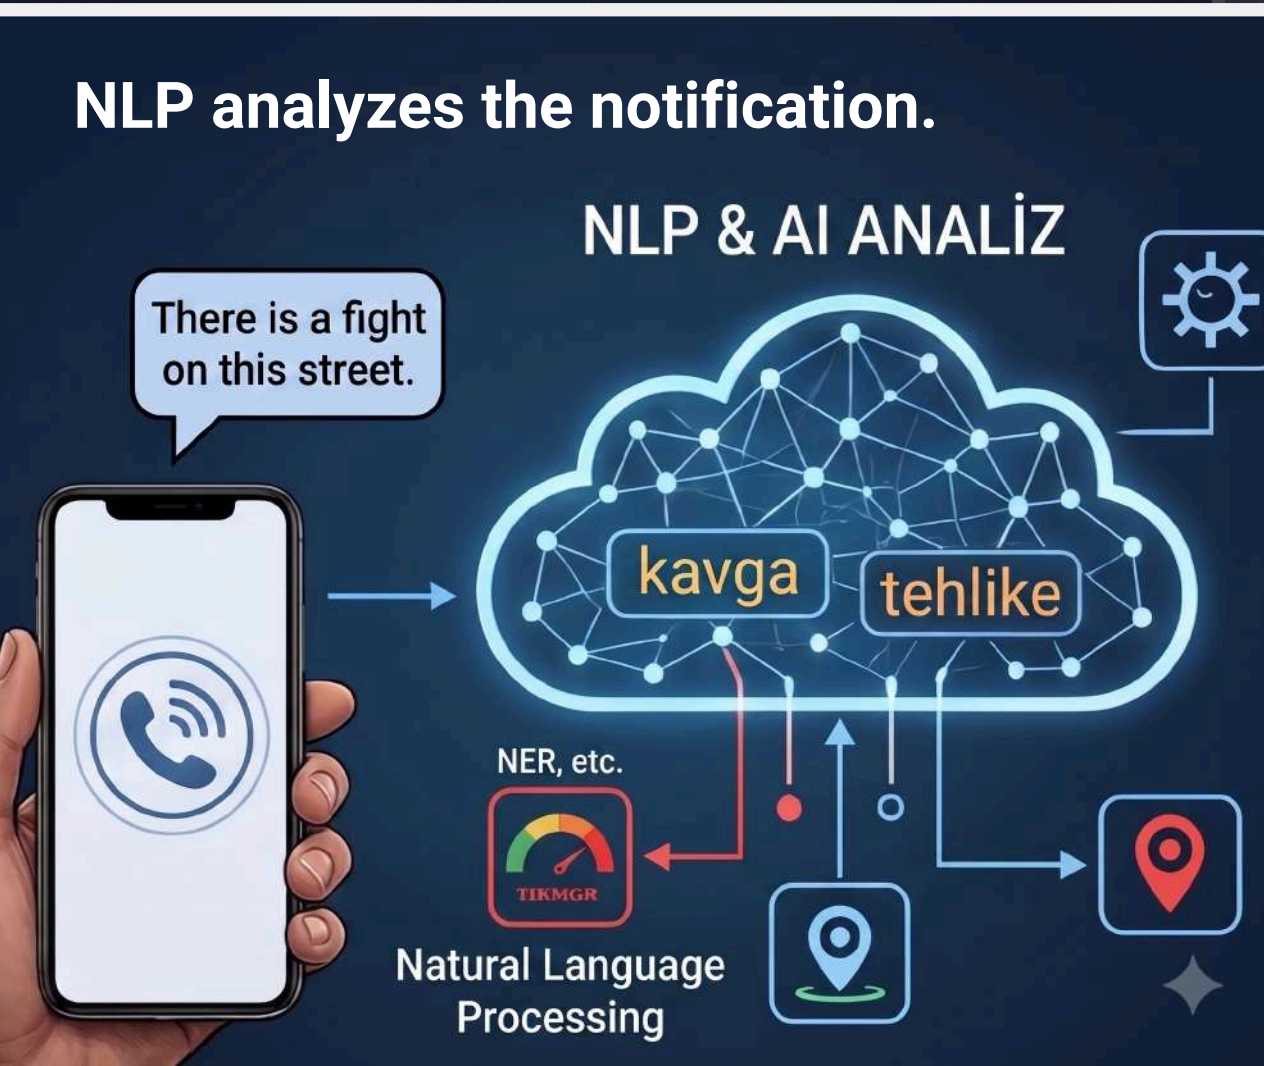

While walking home, he sees a fight.

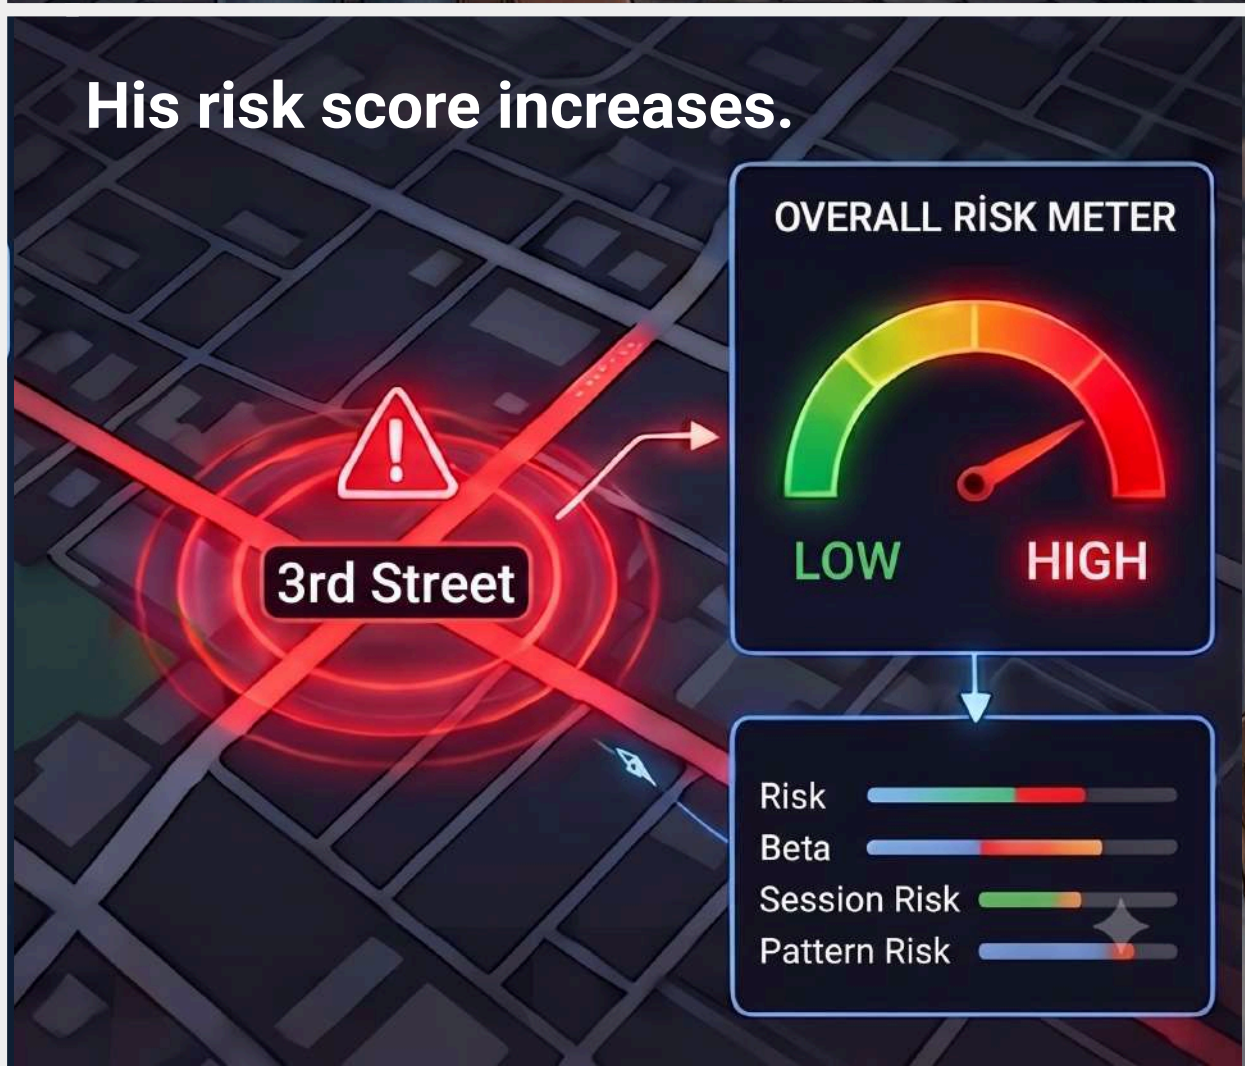

He sends a notification from the SafeRoute app saying, "There's a fight on this street."

NLP analyzes the notification.

His risk score increases.

Alternative routes are suggested to other users who will be passing through that area.
